

CLASSIFICATION RULES:
NORDMANN CLASSIC **YELLOW**

CLASSIFICATION RULES: NORDMANN CLASSIC YELLOW

In general the trees have a natural, healthy look, are uniform and applicable. The trade mark Nordmann Classic guarantees that each and every tree is of high quality and is sorted according to clearly defined criteria. The sorting criteria for Nordmann Classic Yellow correspond to international sorting regulations.

■ COLOUR:

The tree is sound and has a fresh, uniform green colour, which is characteristic for Nordmann Classic.

■ SHAPE:

Width and height of the trees can vary, however the width of each tree must be:

- At least 0.33 times the height
- Not larger than 1.33 times the height

■ DENSITY:

The tree has an equally distributed number of branch wreaths and a sufficient number of internodes which ensures a uniform density. The tree has:

- At least 4 branch wreaths at a height of 1.0 – 1.5 m
- At least 4-5 branch wreaths at a height of 1.5 – 2.0 m
- At least 5-6 branch wreaths at a height of 2.0 – 2.5 m

■ STEM:

The tree has only one stem, which has grown in a way that maintains the symmetry.

■ TOP SHOOT:

The tree has a top shoot.

■ SYMMETRY:

The tree is symmetric and the branches are evenly distributed on the tree. If there are less than 4 branches per branch wreaths on the tree, the tree

is still applicable, provided that it has a sufficient number of internodes, giving the tree a uniform, even shape. Cutting the branches to shape the tree is allowed in order to improve the shape and symmetry.

■ HEIGHT:

The height is measured from the cut face to the point at the top shoot to which the top branch wreath reaches when the branches are bent alongside the top shoot. However, the height cannot exceed the top shoot. The height is classified in the following size intervals:

100 - 150 cm	125 - 175 cm
150 - 200 cm	175 - 225 cm
200 - 250 cm	

■ STUB:

The stub is clean and the length of the stub is between 5 – 10 % of the tree height for trees smaller than 200 cm and between 5 and 15 % of the tree height for trees taller than 200 cm.

■ DAMAGES:

The trees must not have a significant number of damages, such as dead or damaged branches, lichen, moss, algae or obvious damages from insects and animals. The needles should be sound, strong and evenly distributed.

BRAND QUALITY CERTIFIED AND LABELLED

In general the trees have a natural, healthy look, are uniform and applicable. The trade mark Nordmann Classic guarantees that each and every tree is of high quality and is sorted according to clearly defined criteria. The sorting criteria for Nordmann Classic Yellow correspond to international sorting regulations: The trees are sound and have a fresh, uniform green

colour, a harmonious proportion between height and width and a balanced symmetry. This category comprises dense trees as well as more open trees. With evenly grown branch wreaths and whorls the trees have the ideal Christmas tree appearance. The photos below will give you an idea of the different sorting categories of Nordmann Classic Yellow.

**THE LABEL SAYS IT ALL:
QUALITY, SIZE, SECURITY**

Nordmann Classic labels provide customers and sellers with all important information at first sight – this makes the selling process smoother and more successful.

			1,00 - 1,50 m EAN 5708145000 507
			1,50 - 2,00 m EAN 5708145000 521
			2,00 - 2,50 m EAN 5708145000 545
			1,25 - 1,75 m EAN 5708145000 514
			1,75 - 2,25 m EAN 5708145000 538

**THERE ARE TREES WHICH WILL NEVER BE
PROVIDED WITH NORDMANN CLASSIC LABELS:**

Below you see three examples of trees that will never be labelled “Nordmann Classic”. Thus we make sure you will not have any trouble and that you keep your profits high.
