

CLASSIFICATION RULES:
NORDMANN CLASSIC RED

GLOBALG.A.P.

CLASSIFICATION RULES: NORDMANN CLASSIC RED

High quality trees guaranteed: Nordmann Classic guarantees that each and every tree is of a very high quality and sorted according to clearly defined criteria. The sorting criteria for Nordmann Classic red corresponds to international sorting regulations.

■ COLOUR:

The tree has a fresh and sound, uniform deep green colour, which is characteristic for Nordmann Classic top quality.

■ SHAPE:

The width of each tree is less than the tree's height, but at least half of tree's height.

■ DENSITY:

The tree has an equally distributed number of branch wreaths and whorls. A sufficient number of internodes ensure a uniform density. The tree has:

- At least 4 branch wreaths at a height of 1.0 – 1.5 m
- At least 5 branch wreaths at a height of 1.5 – 2.0 m
- At least 6 branch wreaths at a height of 2.0 – 2.5 m

■ STEM

The tree has a straight stem, which accentuates the symmetry.

■ TOP SHOOT:

The tree has one top shoot.

■ SYMMETRY:

The tree is symmetric and the branches are evenly distributed on the tree. The tree should have at least 4 branches of the same length in each

branch wreath. Internodes can compensate for minor imbalances. The branches are cut to make the tree as symmetric as possible.

■ HEIGHT:

The height is measured from the cut face to the point at the top shoot to which the top branch wreath reaches when the branches are bent alongside the top shoot. However, the height cannot exceed the top shoot. The height is classified in the following size intervals:

100 - 150 cm	125 - 175 cm
150 - 200 cm	175 - 225 cm
200 - 250 cm	

■ STUB:

The stub is clean and the length of the stub is between 5 – 10 % of the tree height for trees smaller than 200 cm and between 5 and 15 % of the tree height for trees taller than 200 cm.

■ DAMAGES:

The tree must not have any damages, such as dead or damaged branches, lichen, moss, algae or damages from insects and animals. The needles should be sound, strong and evenly distributed.

BRAND QUALITY CERTIFIED AND LABELLED

High quality trees guaranteed: Nordmann Classic guarantees that each and every tree is sorted according to a clearly defined and certified brand quality. The sorting criteria for Nordmann Classic Red corresponds to international sorting regulations: The trees are flawless, symmetric and straight-stemmed with a

sound, uniform deep green colour. The proportions between height and width are harmonious and the branch wreaths, intermediary branches and whorls have grown evenly. The photos below will give you an idea of the different sorting categories of Nordmann Classic Red.

**THE LABEL SAYS IT ALL:
QUALITY, SIZE, SECURITY**

Nordmann Classic labels provide customers and sellers with all important information at first sight – this makes the selling process smoother and more successful.

			0,80 - 1,00 m EAN 5708145000 118
			1,00 - 1,25 m EAN 5708145000 125
			1,25 - 1,50 m EAN 5708145000 132
			1,50 - 1,75 m EAN 5708145000 149
			1,75 - 2,00 m EAN 5708145000 156
			2,00 - 2,25 m EAN 5708145000 163

THERE ARE TREES WHICH WILL NEVER BE PROVIDED WITH NORDMANN CLASSIC LABELS:

Below you see three examples of trees that will never be labelled "Nordmann Classic". Thus we make sure you will not have any trouble and that you keep your profits high.
